Denver, CO 80203

Dear Sir,

In response to your letter dated March 2, 2004, it is Magpie's intention to perform the following procedures in accordance with COGCC rules concerning inactive wells.

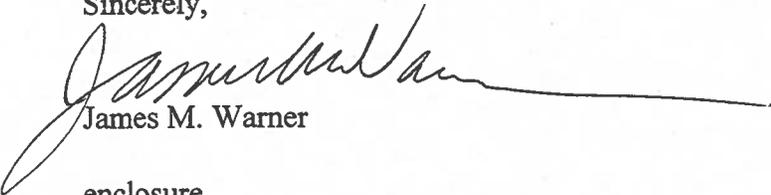

Attached is a list of wells that will be returned to production by October 1, 2004. Also enclosed is a list of wells scheduled for plugging and abandonment. Some of which have been abandoned and we are in the process of locating the paperwork. The scheduling for these procedures will be based upon rig availability and limiting damage to farm crops. It is however, Magpie's intention to have these wells plugged and abandoned prior to October 1, 2004.

The Coulson well (#069-06191), we are not familiar with and have no record of taking an assignment.

I will contact Kevin Lively and quickly run mechanical integrity tests on any wells he deems necessary. At the same time, Magpie will inspect the remainder of the field to verify the status of all wells in the LBDSU.

Please call me at (970) 669-6308 with any questions or comments.

Sincerely,

James M. Warner
