Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

	Operator shall list the Location Facility ID # under Site Information on the next supplemental form 27 for closure if the location will no longer exist after Plugging Procedures are completed.
	ECMC removed final closure request, due to lack of Form 44
	Operator shall conduct an environmental investigation to confirm the presence or absence of impacts adjacent to the flowline at a minimum of every 250'.
	Approval of this Form 27 does not imply approval of pre-abandonment in place notice required by Rule 1105.d.(2).
	For Flowlines, Operators will collect and submit for laboratory analysis a soil sample collected from the areas most likely to have been impacted during the operational life of the flowline. These areas include, but are not limited to: where Flowlines connect to the wellhead, surface equipment, risers, valves, or manifolds; where Flowlines bend or were repaired in the past and at joints and hammer unions; where Flowlines connect to Flowlines or equipment of different material; and where Flowlines crossed drainages or surface water or are in contact with shallow groundwater.
	If flowlines are decommissioned they will need to be documented as a facility and updated on the next supplemental from 27. Flowline decommissioning shall be conducted as follows; Operator shall submit a Form 44 Pre-abandonment notice pursuant to Rule 1105.d.A Form 44 will be filed prior to starting flowline abandonment, and will be included in the Related Forms in a supplemental Form 27.
