Comments:

Final reclamation of the PL24NE well pad was completed in 2018. Based on surface owner requests the historical access road was left in place. The associated variance request was approved in 2020 (Doc #401695005). The remainder of the Well Site was recontoured and reclaimed. 2023 qualitative and quantitative vegetation surveys show that final reclamation of the well pad disturbance is successful and a vegetative community has been reestablished that approximates adjacent reference area composition and cover. Please see the attached vegetation survey report indicating that the reclaimed surface meets Rule 1004 standards. The surface owner requested that the reclamation fencing remain following site closure for livestock use. Please see the attached fencing agreement.
