17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This hole is open, and appears to contain a small amount of fluid. There is no equipment on the well pad or in the hole. In accordance with the BLM letter dated February 13, 1986, we hereby state our intention to abandon this well and request permission to do so.

Neither our records nor the records we could obtain from the Colorado Oil and Gas Conservation Commission contain any information about this hole. We therefore propose to bail this hole dry, then plug it by backfilling with sand and shale cuttings to within 100' of the surface, setting a cement plug over the top 100', and setting a properly marked dry hole marker in place in the top of the cement.

If BLM records contain any information that suggests a change in this plugging procedure is warranted, we will modify it accordingly.
