Comment:

The well location (Location ID 310551 with API 123-26570) meets final reclamation regulations and standards. Unable to find evidence of oil and gas activities and/or disturbances. Well location and access road appear reflective of reference crop areas.

The tank battery does not comply with Rule 1004. Reclamation rules require reclamation activities to be conducted within three months of plugging on cropland. The corner area where the tank battery is located is being used as hay storage by the surface owner and require a variance request.

Corrective Action:

Perform reclamation in accordance to Rule 1004 at the tank battery or submit a variance request.
