**General Comment:**

This is an orphaned well inspection. Inspection completed to document current condition of location, equipment, and wellhead. Inspection may also identify possible task required for final closure/release of location from the Orphaned Well Program. See link at end of report for path to downloadable documents and pictures.

The tank battery is located 200' E of the wellhead, sharing the same Location ID.

Wellhead is not fenced. No livestock observed.

Wellhead checked with soapy solution, bubbles were observed. Audible leak. See attached photo and video.

Attached files have Trimble GPS screenshot for the located surface casing.

Location is fairly level and well head is buried in weeds on three sides.
