## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	35' X 11' X 1' bgs	laboratory analysis

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A compromised gasket on the Jillson East Rinn 3B-22H-M268 separator resulted in approximately 3 bbls of produced water being released inside an unlined containment. The separator was immediately shut-in and the pooled fluid was removed. The impacted soil will be removed following the clearance of utility locates. Confirmation soil samples will be collected and submitted for laboratory analysis in compliance with COGCC Table 915-1. Analytical results will be provided in a subsequent report.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Six (6) grab soil samples were collected for analysis of Table 915-1 organics, metals, TPH C6-36, EC, SAR, pH, and boron.

### Proposed Groundwater Sampling

**SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

The source was removed through excavation of impacted soil.

**REMEDIATION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Additional background samples were collected. Quandary Consultants conducted a statistical analysis to determine the variability between background and source area pH concentrations. The statistical analysis indicated that the variation of pH values are not statistically significant and could be considered naturally occurring.

## Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

The General Liability coverage within the Civitas Resources insurance program includes coverage for bodily injury, property damage, and pollution clean-up costs arising from qualifying pollution events of a sudden and accidental nature subject to a \$1,000,000 per occurrence limit and \$2,000,000 aggregate limit. The Civitas Resources insurance program includes Excess Liability coverage of \$110,000,000 per occurrence and in the aggregate which sits over the sudden and accidental pollution within the General Liability coverage. It is the opinion of Civitas Resources that this total tower of limit is adequate to address the costs of remediation associated with any qualifying pollution event.

Operator anticipates the remaining cost for this project to be: \$ 10000

**COA Type****Description**

	Based on the information presented, the elevated soil suitability for reclamation parameters from the confirmation soil samples appear to be similar to background soil suitability. It appears that no further remedial action is necessary at this time and the ECMC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding ECMC standards or background levels or if groundwater is found to be impacted, then further investigation and/or remediation activities may be required.
