Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Collected sample of drill cuttings.

Two soil sample adjacent to wellhead will be taken and sent to an appropriate lab.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Two soil sample adjacent to wellhead using soil auger and will be sent to an appropriate lab. Please see sample location diagram.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

REMEDIAL ACTION PLAN**SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

Nothing is intended to be removed.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Soil and groundwater was not impacted.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The well was plugged and abandoned on 04/07/2023 and a subsequent Form 6 was approved. This included the GPS coordinates of the as-drilled location. During final reclamation the cellar was removed and backfilled. All debris, and surface equipment was removed. There were no flowlines on this location that needed to be abandoned and reclaimed. The well had no hydrocarbon shows or flows during the drilling, testing or encountered during plugging and abandoning. No production facilities were ever installed on this location. The access road was closed, graded and recontoured. The topsoil was taken from the stockpile and redistributed evenly across the area and the surface was reconstructed to original contours. Then the location was seeded using a Colorado State Land Board (surface owner) approved seed mix with the assistance of the local NRCS office. The seed mix was broadcast-seeded at twice the application rate shown and covered 0.25 to 0.5 inches deep. No noxious weeds were found in the disturbed areas prior to reclamation. An intensive weed monitoring control program is being implemented along with the stormwater management plan.

Is the described reclamation complete? No

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim

☐ Final

Did the Surface Owner provide the seed mix? No

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? Yes

OPERATOR COMMENT

Peter Kondrat and Ryan Costa began reclamation discussions 02/27/2023. A Reclamation Plan was approved via email.

Steve Freese with the Colorado State Land Board was notified via email on April 6, 2023, that the Enterprise State 16-1 (2962) was going to be plugged and abandoned and BNL would be move the location into Final Reclamation. Please see enclosed email. Andrea Gross with Upstream Petroleum Management had several phone calls with Steve Freese to obtain an approved seed mix for the reclamation of the Location the week of April 10, 2023. Colorado State Land Board defers to the local NRCS office to determine the seed mix. A seed mix from the NRCS office was given via email to Peter Kondrat.

Colorado State Land Board accepts notices via email and phone. A follow up phone call with Steve Freese and Andrea Gross occurred on November 14, 2023 to confirm that the email notice and phone calls were sufficient notice.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

Signed: Peter Kondrat
