**General Comment:**

This is a follow up the previous reclamation inspections; Doc #713600094, #713600217.  
See attached photos and additional details within this report.

**Environmental****Waste Management:**

Type	Management	Condition	GPS (Lat) (Long)		
Drill Cuttings	Piles	Inadequate	37.471000	-103.539000	
Comment	<p>Drill cuttings were not stored with berm and liner as described in the waste management plan. The cuttings pile still remains with inadequate containment. The berms around the stock pile appear to be the same material and color of the drill cuttings. The wattles and tarp used as a liner are displaced and not maintained. Previous corrective action has not been completed. Immediate action is required.</p> <p>Additionally, it appears the drill cuttings pile has been reduced in size since previous inspection. If the cuttings have been transported offsite, records will need to be provided to EPS Staff per Rule 905.b(3).</p>				
Corrective Action	Comply with Rule 905. for Management of E&P Waste.				Date: 08/15/2023
Comment	<p>Drill cutting storage, handling, transport, and disposal must comply with Rule 905. Please also refer to 905.b. E&amp;P waste transportation for any offsite transportation of drill cuttings.</p>
