

NOTE: This well is a conventional vertical well. No stimulation will be required to complete this well, therefore no flowback will be required. All formation fluids will be separated with a 3-phase separator. Produced water will be trucked to disposal at a commercial UIC well and condensate (if any) will be sold to an oil purchaser. All gas will be sent to the Ladder Creek Gathering System operated by Tumbleweed Midstream for processing.

Legend	
-----	Buried line
	Plug Valve
	Ball Valve
	Check Valve
	Pressure Recorder
	Level Alert (SCADA remote shut in)
	Flow Recorder
	Emergency Shutdown (SCADA/Remote)

Equipment		
Type	Status	#
Wellhead	Permanent	1
Separator (75 bbl)	NA	0
Condensate Tank (400 bbl)	NA	0
Water Tank (400 bbl)	NA	0
ECD	NA	0
Valves	Permanent	6
Sensors/Recorders	Permanent	2
Emergency Shutdown	Permanent	1
