Emergency precautions taken	N/A
Extremely hazardous substance	No
Acute or chronic health risks	No
Did the spill affect or end near a waterway, irrigation ditch, or a retention pond?	No
What caused the spill/release?	Corrosion

## Narrative

**Include specific incident information and mitigation actions taken to stop and clean-up the spill/release**

A compromised fire tube on the Trott 8E-10-9N separator resulted in approximately 8 bbls of fluid to spill to the ground surface. The spill was contained entirely on pad and a vac truck was dispatched to remove the standing fluids. The impacted soil will be removed and hauled for disposal and confirmation soil samples will be collected in compliance with ECOM Table 915-1. In addition, a waste characterization sample was collected and submitted for full Table 915 analysis. Analytical results will be provided on a supplemental Form 19.

**Acknowledgement**

I acknowledge that a written follow-up notice must be submitted to Weld County OEM/LEPC as soon as practicable after the release. The follow-up notice must update information included in the initial notice and provide information on actual response actions taken and advice regarding medical attention necessary for citizens exposed.
