(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This well has been abandoned according to the following procedure:  
Production casing was removed from the hole.  
Cement plugs have been set at the following intervals--  
(1) T.D. (3500') to 3400'  
(2) 3200' to 3100' (production interval)  
(3) 1800' to 1700' (show)  
(4) 66' to 30' (bottom of surface casing)  
(5) top of surface casing

The intervals between cement plugs were filled with drilling mud, 9.5 weight and 45 viscosity.

The dry hole marker was set in place at the top of the surface casing in the cement plug.

The trash has been removed from the location, and it has been returned to the approximate natural contour and reseeded.

EXHAUSTED  
OIL WELL

18. I hereby certify that the foregoing is true and correct
