14. DESCRIBE PROPOSED OR COMPLETED OPERATIONS ON THIS FORM (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent)

15. DATE OF WORK

Meridian Oil requests temporarily waiving COGCC Rule 324b to run a mechanical integrity test, or plugging and abandon the subject well for a period of six month from the date of approval of this sundry. The subject well is constructed with 1080 feet of 7", 20# K-55 surface casing cemented to surface (12 bbls of cement circulated to surface), and 2100 feet of 4-1/2", 11.6# K-55 production casing also cemented to surface (20 bbls of cement circulated to surface). One set of perforations remain open from 1275' to 1295'. The remainder of the perforations are isolated by a CIBP set at 1370'. The well was completed in November 1994. Meridian believes that all underground sources of drinking water and hydrocarbon bearing zones are properly isolated, when considering the age of the wellbore and the casing and cementing construction. There are no indication that a mechanical integrity test is necessary at this time. Meridian believes there is a shallower hydrocarbon zone which may be of value to another operator, and is in the process of marketing this holding.
