Comment:

Please see attached photo reference of pre-drill site conditions (ECMC Doc #12321161), as compared to 2023 inspection photo report (ECMC Doc #336335). Former well site sits within active livestock operations and is representative of pre-drill conditions. KMOG has also consulted with the surface owner and determined that the access road and cattle guard on site were installed by the surface owner prior to the development of the Magness 16-26A well for the purpose of livestock management.
