Comment

This location does not comply with Rule 1003. During this inspection, it was observed that interim reclamation appears to have been performed, however, the southern portion of the location is experiencing areas of non-uniform vegetation cover resulting in bare soils and undesirable vegetation (e.g russian thistle). Additional reclamation activities are required to stabilize the bare soil and meet Rule 1003 vegetative standards. Refer to attached inspection photos.

Corrective Action

Comply with Rule 1003. The location will remain out of compliance until the corrective action has been resolved.
