### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Soil samples collected 8/1/2023 for soil solubility confirmed the lateral extent of contamination. Samples from 2021 and 2022 contain exceedances above Table 915-1 for EC, SAR, and Boron. Further excavation and confirmation samples (at greater depths) will be collected to determine vertical extents of contamination. See attached Remedial Report for Figures (All Samples Taken to Date and Proposed Soil Samples for Delineation) and next steps. Investment Equipment would like to request a reduced analytical suite for only EC, SAR and Boron.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Further excavation and confirmation samples will be collected at various points to determine vertical extents; see "Proposed Sample Locations for Vertical Delineation" Map for sample locations. Investment Equipment would like to request a reduced analysis on future confirmation samples for only EC, SAR, and boron. Samples will be taken at greater depths to define vertical extents. 2023 samples confirm lateral delineation.

#### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during the site assessment, a grab groundwater sample will be collected and analyzed for all organic compounds per ECMC Table 915-1.

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? Yes

#### SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Pit excavation of hydrocarbon impacted soil was removed and disposed of a Pawnee Waste facility. ~107 cu yds of soil was removed and disposed of, waste manifest attached in remedial report summary. See attached Remedial Action Plan for additional details.

#### REMEDIAL SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Analytical results included herein confirm that hydrocarbon impacts are no longer present at concentrations above Table 915-1 standards at the Colorado State equipment locations, as well as the two Pits. Further investigation will occur within both pits as shown in the attachments. Investment Equipment would like to request a reduced analysis on future confirmation samples for only EC, SAR, and Boron. See attached Remedial Action Plan for additional details.
