### 17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Date of work July, 1979

The well is presently completed in the D2 Zone of the Muddy Sandstone, 4930-33'. It is desired to set a packer below the D2 and to perforate and test the D3 gas zone @ 4942-6'. If successful, the D3 will be blanked off and the D2 produced through a sliding sleeve while waiting on pipeline (approximately one month). After connection, the D2 will be temporarily abandoned and the well officially recompleted in the D3. If the D3 test is unsuccessful, a cast iron bridge plug will be set and the D2 returned to production.

NOTE: Verbal approval from Mr. Doug Rogers given in advance to Ron Thompson of Industrial Gas Services, Inc. as agent for operator.
