Mr. A. J. Jersin
Colorado Oil & Gas
Conservation Commission
1162 1/2 Elati Street
Denver, Colorado

Dear Mr. Jersin:

Enclosed herewith in triplicate is the Well Completion Reports, Form 5, affecting the two captioned wells. Also enclosed in triplicate, is the Producer's Certificate of Clearance and Authorization, Form 10, affecting the transportation of oil from the subject lease.

We have recently drilled a dry hole on this lease, our #3-15 Government #02258, and as soon as the information is available to this office, we will furnish you a completion report on this well.

With further mention of the attached, and other reports affecting the drilling of wells in Colorado Federal lands, is it necessary that we file an Intention to Drill on the State Form, even though we have been granted approval by the U.S.G.S.. I mention this of course, only in connection with wells drilled on Federal Lands.

We would appreciate your advising us regarding the above. It is not our intention to avoid filing any required reports.

Yours very truly,

W. A. McKenna
