Corrective Action:		

Good Housekeeping:

Type	WEEDS		
Comment:	Weed debris in the form of tumbleweeds were observed along the entirety of the perimeter fence line and growing in the interim areas. Tumbleweeds are a troublesome annual non-native weed that easily breaks off at the stem. Operator failed to control and manage weeds to prevent weed waste and prevent the spread of seeds onto adjacent lands.		
Corrective Action:	Comply with Rule 606 to remove weed debris.	Date:	12/15/2023

1002c. PROTECTION OF SOILS _____ Fail _____

Comment _____

This location does not comply with Reclamation rules. Rule 1002.c. states all stockpiled soils shall be protected from degradation due to contamination, compaction and, to the extent practicable, from wind and water erosion during drilling and production operations. Best management practices to prevent weed establishment and to maintain soil microbial activity shall be implemented.

Topsoil stockpile has significant weed cover- Russian thistle and Kochia- with no perennial vegetation that would compete with the weedy vegetation and generally work to decrease weed growth.

Corrective Action _____

Best management practices to prevent weed establishment shall be implemented. Control, manage, and prevent weedy, annual vegetation on all topsoil stockpiles. If reseeding is an option for long-term protection and stabilization of topsoil, then the next favorable seeding opportunity shall be conducted.

1003 f. Weeds Noxious weeds? _____ F _____

Comment

It appears the operator has reduced the disturbance to the areas only needed for production operations. However, interim areas are dominated by russian thistle and bare soil throughout the well location, the northern area of the well location is growing Colorado noxious weed list C species Puncturevine and the topsoil stockpile is dominated by russian thistle and bare soil with evidence of vehicle tracking throughout the interim areas.

Corrective Action

Perform reclamation in accordance to Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards, including stormwater and weed management.
