**Subject:** Chevron Sidetrack

Diana, to follow up on our conversation on the sidetrack request here are the specific details.

Well name – Bishop A18-742

API – 05-123-52071

Drilling Rig – Patterson 268

- i. While drilling the vertical, our bottom hole assembly twisted off at 6,077' and we are unable to fish it
- ii. Current Depth – 6,077' MD.
- iii. 9.625" 36ppf surface casing shoe @ 2,067' MD (2013.8' TVD).
- iv. There will be fish in the hole – bit, bit box and drive shaft of the motor which is a total length of ~1.5'
- v. This will be an open hole sidetrack in the vertical at approximately 5,300' MD.
- vi. One 1,000' cement plug will be used to abandon the current wellbore.
- vii. Sidetrack KOP at cement plug ~5,300'MD

- viii. Same objective formation (Niobrara) will be targeted in the sidetrack.
- ix. TPZ and BHL for sidetrack will be the same as the originally permitted wellbore.

Happy New Year and let me know if you need anything else.
