**CORRECTIVE ACTIONS:**

1  CA# 188445

Corrective Action: Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.

Date: 11/02/2023

Response: CA COMPLETED Date of Completion: 12/13/2023

Operator Comment: Please see attached photo reference of pre-drill site conditions (ECMC Doc #12321161), as compared to 2023 inspection photo report (ECMC Doc #336335). Former well site sits within active livestock operations and is representative of pre-drill conditions. KMOG has also consulted with the surface owner and determined that the access road and cattle guard on site were installed by the surface owner prior to the development of the Magness 16-26A well for the purpose of livestock management.

COGCC Decision: Approved pending re-inspection

COGCC Representative: Approved pending re-inspection of this FIR resolution acknowledges the document was received. It is not an acknowledgement that the corrective action has been passed. A field inspection will be conducted at a future date to evaluate compliance with ECMC standards.
