Mt. Hope North Field, Logan
County, Colorado.

Dear Sirs:

I am returning your form OGCC Form 10 with this letter of explanation ~~that~~ this is not a new well completion. This well was completed in December 1955, General Resources Ltd. was the operator of the lease at that time. In August 1956 operations were turned over to Banner Oil Co. by General Resources and they let the well go off production in December 1956.

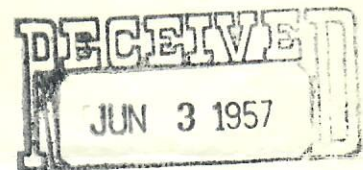

I, as a working interest owner, took over operations of this lease in March 1957. I repaired the pumping unit, also the insert pump and got the well back to pumping on the 22nd day of March 1957. The well has produced from 40 bbls to 60 bbls. per day and for the past 30 days it has averaged approximately 50 bbls. per day.

If there is any other information you desire regarding this lease, please advise.

ats/s

Very truly yours,

A. T. Skaer
