Good Housekeeping:

Type	OTHER		
Comment:	The previous inspection (doc #708200769) documented fugitive dust originating from topsoil salvage operations. During this inspection, Staff observed that fugitive dust was occurring from dirt work operations and that no apparent BMPs were being utilized in order to control fugitive dust (e.g. water truck, delayed/stopping operations, etc). Refer to attached inspection photos.		
Corrective Action:	Take actions to control fugitive dust per Rule 427.c. Corrective action date is the date the location was observed out of compliance.	Date:	12/19/2023
Type	TRASH		
Comment:	Trash was observed throughout the location, primarily on the eastern side of the disturbance area. Refer to attached photos.		
Corrective Action:	Comply with Rule 606. The location will remain out of compliance until the corrective action has been resolved.	Date:	12/28/2023

1002b. SOIL REMOVAL AND _____ In _____

Comment _____

During this inspection, Staff observed that topsoil salvage operations were currently in process, with topsoil being stockpiled on the northern end of the location. The Operator shall ensure that all topsoil is salvaged from the location and access road according to Rule 1002.b. A future inspection will be conducted at a later date to verify topsoil salvage requirements. Refer to attached inspection photos.

Corrective Action _____

Date _____

1002c. PROTECTION OF SOILS _____ Fail _____

Comment _____

This location does not comply with Rule 1002.c. During this inspection, Staff observed erosion degradation occurring along the southeastern corner of the disturbance area with evidence of blow sand deposition outside of the fenced disturbance area. Soils are not properly stabilized and require the implementation of BMPs to prevent further erosion degradation. Refer to attached inspection photos.

Corrective Action _____

Comply with Rule 1002.c. The location will remain out of compliance until the corrective action has been resolved.

COGCC Comments

Comment	User	Date
Per Rule 1002.f., oil and gas operators shall implement and maintain Best Management Practices (BMPs) at all oil and gas locations to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and site degradation. BMPs shall be maintained until the facility is abandoned and final reclamation is achieved pursuant to Rule 1004. Operators shall employ BMPs, as necessary to comply with this rule, at all oil and gas locations, including, but not limited to, well pads, soil stock piles, access roads, tank batteries, compressor stations, and pipeline rights of way. BMPs shall be selected based on site specific conditions, such as slope, vegetation cover, and proximity to water bodies, and may include maintaining in-place some or all of the BMPs installed during the construction phase of the facility. Where applicable based on site-specific conditions, operators shall implement BMPs in accordance with good engineering practices.	edwardsond	01/02/2024
