General Comment:

On 1/5/2024, Reclamation Specialist Trujillo conducted a final reclamation and stormwater inspection at Caerus Piceance LLC's ROSE RANCH-67S93W 14NWSE location in Garfield County, Colorado.

The following compliance issues were observed during this inspection:

- Final Reclamation
- Undesirable and Noxious Plant Species

Refer to the "Reclamation" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Corrective Action date(s) provided will either be back-dated to when Operator should have been in compliance, or when Operator was initially observed to be out of compliance; the "Date of Discovery" is being provided as the corrective action date for all new observed compliance issues. Location will remain out of compliance until corrective action(s) has(have) been resolved; a follow up inspection will be conducted to ensure the compliance issues have been corrected to comply with ECMC rules.

Comment: Corrective Action: Date: **Good Housekeeping:**

Type	WEEDS		
Comment:	<p>Inspection #702801521 observed Noxious weeds (Scotch thistle) established on the Location. Inspection required Operator to conduct ongoing weed management to prevent the further spread and establishment of weeds. Operator submitted Resolution #403413114 stating "All thistles were manually removed. Weed contractor has been notified to hit new rosettes this summer/fall".</p> <p>It was observed in this inspection that ongoing weed management has been inadequate; Noxious weeds (Scotch thistle) established during the 2023 growing season were observed on the Location, and along the former access road. New growth (rosettes) also observed.</p> <p>Ongoing weed management has not been performed, or has been inadequate.</p>		
Corrective Action:	Comply with Rule 1004.e and 606.c: Conduct weed management to prevent further establishment and spread of noxious weeds; ongoing weed management required until location passes final reclamation.		Date: 01/05/2024

Comment:

<p>Records show the last wells on the Location were P&Ad in 2020; at least 3 growing seasons have passed since abandonment.</p> <p>Though desirable perennial plant establishment towards the perimeter of the Location is largely uniform, it was observed in this inspection that large areas towards the center of the Location are not progressing towards ECMC 1004 Reclamation requirements. Though some desirable plant establishment was observed along the access road, vegetation within these areas are also predominantly undesirable plant species.</p> <p>Additional reclamation efforts during the 2024 growing season will be required in these areas.</p>
