Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

On 4/19/22 3 samples and 4 BG samples were collected. Analytical results indicate elevated Arsenic and/or SAR at B5 and B7. Due to issues with the landowner, Mull Drilling has not had access to the site since the 4th quarter of 2022. Mull is seeking a variance per Rule 502.B.

OPERATOR COMMENT

See document number 403546631 site investigation report for all figures, tables, and laboratory analytical reports for all work completed to-date.

The operator, per ECMC rules and regulations, has commenced assessment activities, at the Pattie 2-2 location. However, the landowner has communicated with Mull that he would not grant rights to perform any further remedial activities required for ECMC compliance. The landowner has therefore imposed tangible impediments that prohibit the operator's physical access to the location. A signed remediation access denial has been signed by the surface owner and attached. Under current circumstances, Mull is unable to currently proceed with any operations or activities at the location so long as the landowner is prohibiting access. Mull is seeking a variance per Rule 502.B

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
