## Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

**OPERATOR COMMENT**

KPK believes that the stressed vegetation is not associated with KPKs operations based on the condition of the vegetation (discolored but not dead), our buried facility locations, and pressure testing data (attached).  
KPK will oblige ECMCs request for submittal of this Form 27 to collect additional site assessment information. KPK will conduct this survey in the spring when the stressed vegetation can be observed and not obscured by winter conditions.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
