**CORRECTIVE ACTIONS:**

1  CA# 175938

Corrective Action: Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.

Date: 07/01/2023

The corrective date is not intended to be the date for which the Operator shall complete the corrective actions but rather the corrective date is the date the location was observed out of compliance.

Response: CA COMPLETED

Date of Completion: 10/06/2023

Operator Comment: After field verification, the former well head is located within the same vegetation as the production facility. It appears from the photo and supplied aerial image, the inspector marked former well location about 30 yards south of the actual well and outside PDC's disturbance. The disturbance the inspection may identified as PDC's was from the associated mine.

COGCC Decision: Approved pending re-inspection

COGCC Representative: Approved pending re-inspection of this FIR resolution acknowledges the document was received. It is not an acknowledgement that the corrective action has been passed. ECMC staff will conduct a follow up inspection to evaluate the property boundaries in relation to the well location.
