Date of Completion: 12/04/2023

Drill cuttings have been transported off location and disposed in compliance with Rule 905.b.

Operator
Comment:

COGCC Decision: **Not Approved**

COGCC Representative: See Follow up inspection on 1/18/2023 document #713600640.

OPERATOR COMMENT AND SUBMITTAL

Comment: To expedite the management of the drill cuttings and prevent any further releases, in compliance with Rule 905.b.(1) and (3), Rule 905.g.(1).c., and Rule 905.e.(1) a., the drill cuttings have been managed as Oily Waste and have been removed from the location and disposed at an approved waste facility. Attached is a photo of the packaging and specs of the tarps used to contain the drill cuttings at this location. The actual packaging is not available; however, these are the same tarps provided from the warehouse with sizing appropriate for the area. Attached are the manifestos which are also signed by the land fill operator stating they are in acceptance of E&P waste. The land fill operator has been provided copies of the Table 915-1 results for the RR 35-08 well. Interim reclamation commenced December 8th. Notification was provided on Field Operation Notice Form 42, Doc. No. 403620101. In compliance with Rule 1003.c., and the approved Red Rocks 35-08 Interim Reclamation Plan, to decompact soil layers the areas reclaimed were ripped to an estimated depth of eighteen (18) inches except in those areas with restrictive features encountered at a shallower depth.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.

Print Name: Cathy Bulf

Signed:
