## Description of Corrosion Protection

8 North's corrosion procedures are detailed in its Flowline Management SOP. Coating materials will be used that minimize internal and external corrosion, such as internally coated pipe or stainless steel for water service, and externally coated FBE on all buried steel pipe. If flowlines are repaired due to corrosion, 8 North will investigate the failure, promptly respond with the appropriate remedial actions and determine the root cause and apply corrective actions as necessary. 8 North retains records of its chemical program in the form of Failure Analysis Reports, records of chemical invoices and chemical delivery.

## Description of Integrity Management Program

8 North's integrity management program is detailed in its Flowline Management SOP, which covers flowline installation, operation, maintenance, inspection, testing, and repairs. Prior to beginning any project involving flowlines, 8 North ensures the project plans, flowline installation, flowline maintenance (including repairs) and all flowline inspection and testing projects meet the requirements of the Flowline Management SOP. All pressure tests on flowlines will be conducted by an independent, third party qualified to do such testing. Precautions shall be taken to protect employees and the general public.

Description of the construction method used for public by-ways, road crossings, sensitive wildlife habitats, sensitive areas, and natural and manmade watercourses (i.e., open trench, bored and cased, or bored only), if applicable.

#### **Abandonment Verification**

The abandoned Off-Location Flowline was located within the jurisdiction(s) of the following local government(s).

(No Jurisdiction)

#### **Description of Abandonment Verification:**

The flowline serving the DF RANCH 10-42 (05-123-30030) was removed in its entirety via the open trench method. The trench was backfilled and the land surface graded.

### **OPERATOR COMMENTS AND SUBMITTAL**

Comments Form 44 filed to report POST-ABANDONMENT verification. The following flowline was removed:  
12330030FL: serviced DF RANCH 10-42 (05-123-30030)  
Updated GIS data attached. Because the previously reported abandonment of the 12330031FL was removed prior to GIS requirements, updated GIS data for this specific line is not available.  
All other related flowlines will remain as previously reported.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
