Comment: The beginning of the access road has not established vegetation and is not stabilized. The location appears to be stabilized and perennial vegetation is progressing. There are erosion issues along the road that need to be repaired and reclaimed. The former access road will need to be reclaimed for long term stabilization. The corrective action date is set for when final reclamation should have been completed. Corrective action must be performed immediately.

<div style="display: flex; justify-content: space-between;"><div>Comment: There is erosion along the former access road which is not stabilized. Stormwater appears to be directed from the location all the way down the access road causing erosion. Areas of erosion must be repaired and stabilized. BMP's must be implemented in accordance with good engineering practice and must be maintained. This is the eighth notice documenting the same erosion issues. Corrective action must be performed immediately.</div><div>Corrective Action: Install or repair required BMPs per Rule 1002.f.(2)</div><div>Date: _____</div></div>
