General Comment:

This is a follow up of the previous reclamation inspections and in regard to NOAV #403595832.
The corrective actions of the previous inspections have not been completed.
See attached photos and additional details within this report.

Location**Lease Road:**

Type	Access		
comment:	The lease road is now accessible.

Good Housekeeping:

Type	UNUSED EQUIPMENT		
Comment:	There are equipment storage trailers that remain on location that need to be removed. Previous corrective action was not completed.		
Corrective Action:	Comply with Rule 606	Date:	06/07/2023

Overall Good: ☐**Spills:**

Type	Area	Volume		
Crude Oil	Tank			
Comment:	There was a dripping leak observed at the backside of the tank valve. The dripping leak was no longer observed and the tank appears to be empty. It is uncertain if the spill at the backside of the tank was properly cleaned up or if the tank was repaired, therefore corrective action remains. There was oil stained soils found at the front side of the tank that needs to be cleaned up.			
Corrective Action:	Control and contain spills/releases and clean up per Rule 912.a. Conduct maintenance on equipment, cleanup stained material and review self inspection processes.			Date: 11/11/2022

In Containment: No

Environmental**Waste Management:**

Type	Management	Condition	GPS (Lat)	(Long)
Drill Cuttings	Piles			
Comment	The cuttings pile still remains on location. There is a berm installed around the cuttings pile along with a plastic liner for containment. There are signs where gray cuttings have washed across the pad surface and have not been cleaned up. It does not appear a form 27 has been submitted. Previous corrective action has not been completed.			
Corrective Action	Comply with Rule 905. Immediately clean up. Implement or modify BMPs for improved material handling and spill prevention. Additionally, Operator shall file a Form 27 for the remediation of the Drill Cuttings per Rule 905.g.			Date: 01/24/2023

1003 f. Weeds Noxious weeds? F

Comment

The vegetation is now dormant but undesirable and noxious weeds were previously observed. There did not appear to be any weed control performed since previous inspection. The access road and location are not stabilized and disturbed areas are not reclaimed. The soils that were pushed out during drilling operations have not been replaced and reclaimed. Previous corrective action was not completed.

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: There have been erosion repairs performed along the access road and culverts were installed at the drainage crossing. It does not appear the two culverts are adequately sized or installed to handle storm events. There has been rock and debris pushed up along the drainage across the road to the northwest which could restrict drainage flow (photo 2). There are loose sandy soils along the road that are not stabilized. There are still signs of erosion at the location. The cut and fill slopes are not stabilized and existing BMP's are insufficient. BMP's must be implemented in accordance with good engineering practice and must be maintained. Corrective action will remain out of compliance until completed.

Corrective Action: Install or repair required BMPs per Rule 1002.f.(2)

Date: 12/30/2022

Pits: ☒ NO SURFACE INDICATION OF PIT
