**SOURCE REMOVAL SUMMARY**

Describe how source is to be removed.

The source impacts were removed via excavation of impacted soil above EMMC Table 910-1 standards. Residual source impacts will be treated with a combination of air sparge and soil vapor extraction.

**REMEDIATION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

A soil vapor extraction and air sparge system has been designed and installed to remediate residual impacts to soil and groundwater. The system is currently operational. Groundwater will be sampled on a quarterly basis to ensure the dissolved groundwater plume is stable and decreasing. Contingent on active remediation results, an estimated no further action request will be submitted prior to December 2026.

### **GROUNDWATER MONITORING**

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Fifty (50) monitoring wells were installed and will be sampled on a quarterly basis. Groundwater samples will be submitted to a certified laboratory under proper chain of custody procedures and analyzed for BTEX, naphthalene, 1,3,5-trimethylbenzene, 1,2,4-trimethylbenzene, and chloride ions.

Fourth quarter 2023 analytical results indicated that the benzene concentration was in exceedance of the applicable ECMC Table 915-1 regulatory standard in monitoring well BH23R2.

Monitoring well BH52R was used for establishing cross-gradient background levels for chloride ion concentrations. Based on a comparison of monitoring wells to background levels at BH52R, the chloride anion concentration was in exceedance of the applicable ECMC regulatory standard in monitoring well BH58.
