General Comment:

This is a follow-up Final Reclamation and Stormwater Inspection to Field Inspection Report (Doc #708200711 dated 11/27/2023; Doc #708200559 dated 09/18/2023; Doc #708200446 dated 08/03/2023; Doc #708200216 dated 05/03/2023; Doc #696105620 dated 11/22/2022; and Doc #696105548 dated 10/24/2022).

This inspection is in response to Operator submitted FIRR (Doc #403615870 dated 12/06/2023) stating that corrective actions from the previous field inspection (Doc #708200711) have been completed.

This inspection is also in response to a Reclamation Complaint (Doc #403201074) received on 10/18/2022.

The following compliance issues were observed during this inspection and it is clear that corrective actions were not completed since the previous inspections:
- Reclamation

Comment:

Corrective Action:	This location does not comply with Rule 1004. It does not appear any reclamation work has been performed at the location since the previous inspection (Doc #708200711) conducted on 11/27/2023. During this inspection, Staff observed that gravel/road base remains at the former wellhead, access road and former production areas which have not been decompacted, contoured, or graded to reflect reference areas. Areas not impacted by active remediation will need to be reclaimed ASAP, in accordance with 1004 Rules. Refer to attached inspection photos for documentation.	Date 07/22/2019
	<p>Comply with 1004 Rules immediately. Active remediation should not preclude the commencement of final reclamation activities on portions of the location that are not affected by active remediation.</p> <p>Corrective action date is being back dated to when final reclamation activities should have been completed.</p>	
Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
