Dear Sir:

Enclosed herewith are a descriptive sample log, core descriptions, bit record, coring time and drilling time from your No. 1-Mitchell, Washington Co., Colo. The formation tops and other data are as follows:

DAVIS OIL CO., & CIMARRON WESTERN DRILL. CO., NO. 1-MITCHELL

Schlumberger measure was 3 feet deeper than driller at the "D" sand, 4 feet deeper than driller at the "J" sand and 6 feet deeper than driller at total depth.

No shows of oil or gas were encountered in the "D" sand.

The "J" sand contained a slight show of oil in a very tight shaly sand from 1910-12' Drilr; 4914-16' Schlum. Core analysis confirmed that the permeability in the zone

of show was less than 10 millidarcys, therefore this slight show was not drill stem tested.

No further shows were encountered, therefore the No. 1-Mitchell was abandoned.

Very truly yours,
