Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

**OPERATOR COMMENT**

Summit DJ-S LLC acquired this and other assets in December 2022. However, Summit DJ-S did not obtain an operator number until January 2024. Therefore, this form was originally submitted via email to Krystal Heibel on October 27, 2023. Please see attached for the original form.

Summit DJ-S (Summit) excavated and sampled this spill in August 2023. Please see attached for confirmation sample analytical data. Analytical results indicate that exceedances in EC, SAR, Arsenic, and pH still exist.

Summit plans to re-excavate to remove these exceedances in Q4 2023 or Q1 2024.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
