RE: Plugging Bond
#87-0130-10093-90-5

#1-32 X Huey
SW NW 32-2N-56W

Dear Ms. Moore:

We are responding to your letter of September 4, 1991 requesting release of the above captioned bond.

Our records indicate that this particular site has been inspected three different times-the last time being August 2, 1991 when our field engineer found equipment still on site. Therefore the site could not pass inspection. Because of our efforts to facilitate your bond release, we will need photos showing that restoration is complete before we make arrangements for a final inspection. We would require that a representative of Petex or H & R be present and accompany us for that final inspection.

Please call us if we can answer any further questions.

Sincerely,

John R. Stowell, P.E.
Deputy Director
