Attn: J.W. Jackson
700 Mercantile Bank Bldg.
Dallas, Texas

Gentlemen:

We recently received from you "Certificates of Clearance - - -", OGCC Form 10 for the Arthur Pederson #3, G.E. Huey #8, and G.E. Huey #25. Each of these show Arapahoe Pipe Line Company as transporter, none show gas transporter.

Since the Arthur Pederson was a shut in gas well, the G.E. Huey #8 was a shut in gas well, and we had previously approved this form (March 26, 1962) for the George E. Huey #25, we thought it might have been intended for gas transportation.

Will you please review the above, submit such forms as may be needed for gas sales, and advise the date of first production on each of the above at your earliest opportunity.

Very truly yours,

OIL & GAS CONSERVATION COMMISSION

William R. Smith, Senior Petroleum Engineer
