 TRANSECT RESULTS OF DISTURBED AREA% _____
 TRANSECT RESULTS OF REFERENCE AREA% _____
 TOTAL % OF DESIRABLE VEGETATION COVER _____
 VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____

Comment This location does not comply with Rule 1003. During this inspection, it was observed that interim areas appear to have been impacted by stormwater erosion degradation with evidence of bare/exposed soils. Soils without desirable perennial vegetation are not properly stabilized and require additional reclamation activities. Refer to attached inspection photos and stormwater section comments for additional.

Corrective Action Perform reclamation in accordance to Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards.

Date 04/30/2024

Well Release on Active Location

Multi-Well Location

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: This location does not comply with Rule 1002.f. Western portions of the production areas appear to have previously experienced erosion degradation; it also appears that the Operator has repaired erosion issues with evidence of dirtwork activities. No apparent stormwater control measures were observed on location that would manage or control stormwater runoff from impacting interim and reference areas. Refer to attached inspection photos.

Corrective Action: Install or repair required BMPs per Rule 1002.f.

Date: 03/21/2024

Pits: NO SURFACE INDICATION OF PIT
