Comment This location does not comply with Rule 1003. During this inspection, it was observed that interim areas are not progressing towards Rule 1003 standards and regulations. Evidence of bare/exposed soils and and undesirable vegetation was observed throughout. Soils appear to be unstabilized with evidence of wind erosion and animal burrows throughout. Additional reclamation activities are required to comply with Rule 1003. Refer to attached inspection photos for documentation.

Corrective Action Perform reclamation in accordance to Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards.

Comment:

This location does not comply with Rule 1002.f. During this inspection, it was observed that portions of the production areas were experiencing erosion degradation. Maintenance/repairs of unstabilized soils and/or implementation of stormwater control measures is required to manage stormwater runon and runoff at this location. Refer to attached inspection photos for documentation.

Corrective Action:

Install or repair required BMPs in accordance with good engineering practices per Rule 1002.f.
