General Comment:

Inspector Name: Trujillo, Aaron

On 3/06/2024, Reclamation Specialist Trujillo conducted an interim reclamation and stormwater inspection at TEP Rocky Mountain LLC's FEDERAL-66S94W/9SWSW location in Garfield County, Colorado.

Location is Federal Surface and High Priority Habitat.

This inspection is a follow-up to #696205533 to document compliance with the following corrective actions:

- Stormwater
- Fence in disrepair

It was observed in this inspection that the CA regarding stormwater and fence maintenance remains outstanding.

The following new compliance issues were observed during this inspection:

- Anchors improperly marked

Refer to the "Location", "Reclamation" and "Stormwater" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Comment:		See "COGCC Comments".				Date: _____
Corrective Action:		Corrective Action per Inspection #696205533: Comply with Rule 1002.f- install or repair required stormwater and erosion control measures in accordance with good engineering practices to minimize erosion, degradation and off-site sediment transport; maintain BMPs in proper functioning condition. Regrading alone is inadequate.				
Pits: <input type="checkbox"/> NO SURFACE INDICATION OF PIT						

COGCC Comments		
Comment	User	Date
STORMWATER COMMENT Inspection #696205533 observed that stormwater and erosion control BMPs were missing or insufficient on the Location: -BMPs to stabilize the working pad surface are no longer in proper functioning condition; control measures to minimize tracking inadequate; control measures to minimize off-site sediment transport by equipment, such as vehicle tracking pad, also not observed. Erosion degradation observed on southeastern slopes of the Location Inspection required Operator to comply with Rule 1002.f. It was observed in this inspection that work to address the corrective actions has not been performed, or has been insufficient: -BMPs to stabilize the working pad surface remain missing or insufficient; degradation/tracking on the working pad surface has persisted; control measures to minimize off-site sediment transport by equipment, such as vehicle tracking pad, also not implemented. Stormwater BMPs to manage runoff, as well as to minimize erosion and degradation remains missing or insufficient at the southeastern slopes of the Location; erosion degradation has persisted The stormwater corrective action per inspection #696205533 has not been addressed and remains applicable.	trujilloam	03/07/2024
