

**Remediation Project Contractors  
Ilse Dome, Moffat County, CO**

*Lead Contractor*

**Hurricane Services 21, LLC**

Location: Newcastle, WY – Operates in CO, MT, ND, SD & WY

**Qualifications & Credentials:**

Specializes in pipeline tank maintenance, pipeline spill remediation, certified pipe welding, tank battery construction, and piping design.

Certifications include AVETTA Safety Compliance, Operator Qualification Solutions Group Operator Safety and Best Practices, OSHA, DOT Safety Compliance, and more.

Staff trained in confined space, H2S, supplied air, vac truck operations, and hold HazWopper and DOT HazMat licenses.

**Role:** Oversee remediation activities, including spill remediation, welding, tank battery construction, and piping design. Ensures all operations meet safety and environmental standards.

**Excavation:** Safely excavating contaminated soil and materials, ensuring minimal environmental impact and adherence to safety protocols.

**Remediation:** Implementing comprehensive remediation strategies to treat and dispose of hazardous materials. While ensuring the site meets environmental standards for safety and health.

**Supervision:** Oversee project operations and coordinate between various contractors and consultants to ensure efficient execution. Monitoring project progress, managing timelines, and ensuring all activities comply with regulatory requirements and best practices.

**Safety and Compliance:** Enforcing strict safety standards and compliance with all relevant environmental regulations. Conduct regular safety audits and risk assessments to protect workers and the environment.

**Communication:** Serving as the primary point of contact for timely communication regarding project status, challenges, and milestones.

### Supporting Contractors, Consultants, and Guidance

#### **Sagebrush Services – Roustabout and Labor for Remediation and Excavation**

Location: Casper, WY, with services in CO & WY.

Expertise: Specializes in providing comprehensive roustabout services, including construction, maintenance, and repair of oil and gas infrastructures, as well as skilled labor for a wide range of tasks.

Role: Sagebrush Services will provide labor for the remediation, excavation, and related tasks essential to the Ilse Dome project. This will involve working closely with other contractors to ensure that all tasks are performed to the highest safety and efficiency standards. Sagebrush Services will perform various activities, including site preparation and the physical labor required for excavation and remediation.

#### **LesAir – Air Quality**

Location: Offers nationwide services, main office in Denver, CO.

Expertise: Air quality monitoring and management, providing critical air pollution impact assessments for project compliance and environmental safety.

Role: Monitoring and reporting on air quality for the Ilse Dome Field.

#### **SWCA – Sampling & Permit Support**

Location: Operates across the United States, primarily engaging with Sheridan, WY office.

Expertise: Environmental consulting focusing on natural and cultural resource management, environmental planning, and regulatory compliance services.

Role: SWCA will ensure that all activities comply with the specific requirements of the CDPHE discharge permit (CO000051), conducting necessary environmental assessments and reports to maintain adherence, including NetDMR reporting. Their expertise in regulatory compliance will be critical in navigating the permit renewal process and ensuring ongoing compliance.

*Supporting Contractors, Consultants, and Guidance (cont)*

**PACE Labs – Sample Analysis**

Location: Minneapolis, MN, with multiple locations across the Midwest.

Expertise: Specializes in analytical and testing services for environmental samples, including water, soil, and air.

Role: Conduct specialized and delicate environmental testing required for the project. PACE Labs will be used for complex analyses that require advanced methodologies.

**Energy Labs – Sample Analysis**

Location: Casper & Gillette, WY

Expertise: Provides a wide range of testing services for environmental, petroleum, and industrial samples.

Role: Will complete the comprehensive soil analysis, identifying contaminants and assessing pollution levels within the project site.

**ACZ Laboratory Sample Analysis**

Location: Steamboat Springs, CO.

Expertise: Focuses on environmental sample analysis with a commitment to quality, customer service, and comprehensive analytical support.

Role: Provide rapid, local testing services for immediate project needs. ACZ Laboratory will handle routine analyses, delivering quick turnaround times to support ongoing decision-making and operational adjustments.

*Supporting Contractors, Consultants, and Guidance (cont)*

**Star Production Service – Field Training and Operations Guidance**

Location: Newcastle, WY, serving the Rockies Region.

Expertise: Offers contract pumping, extensive field training, safety programs, and operational support for oilfield services.

Role: Provide critical training and operational guidance for personnel as the field is returned to production. Their expertise in field operations will ensure that all staff are adequately prepared to manage the site safely and efficiently. Training will cover operational best practices, safety protocols, and emergency response procedures. They will also be available to start training and support field personnel throughout the remediation process.

**AP Production Service – Tank Battery Design and Operations Controls**

Location: Newcastle, WY, Operates in CO, MT, ND, SD & WY

Expertise: Specialized in rig supervision, field management & implementing tank battery systems and operations for the oil and gas industry.

Role: Serve as a consultant throughout the remediation process, specifically focusing on improving the tank battery system. Their role will involve assessing the current system, recommending enhancements, and overseeing the implementation of improvements to ensure optimal performance and compliance with environmental standards.

**Whirlwind Recycling – Guidance on Proper Disposal of Cement & Materials**

Location: Osage, WY, serving the Rockies Region.

Expertise: Provides environmentally responsible disposal solutions and recycling services for the construction and demolition sectors.

Role: Consulting on practices for the environmentally responsible dismantling and disposal of materials from the cement pit. Guidance from Whirlwind Recycling will help to ensure that all materials are handled according to best practices for environmental protection and waste management, minimizing the environmental impact of disposal activities.

*Supporting Contractors, Consultants, and Guidance (cont)*

**Prairie Well Service** – Trucking, Equipment, and Rigs & Well Maintenance

Location: Casper, WY, with operations throughout WY.

Expertise: Specializes in well servicing, rig operations, and maintenance, ensuring optimal production and safety standards.

Role: Available to provide trucking, vacuum trucks, and equipment rental. Additionally, Prairie Well Service will be on standby for future well workovers, offering their expertise to ensure the efficient and safe execution of well interventions and maintenance.

**Wyoming Energy Consultants** – Land Support

Location: Casper, WY, focusing on the Rocky Mountain region.

Expertise: Provides landman services, permitting, and regulatory compliance services.

Role: Offer landman support and guidance upon request by POC-I.

**Jost Energy Law** – Legal & Regulatory Compliance

Location: Denver, CO

Expertise: Specializes in energy law, focusing on regulatory compliance, environmental law, and transactional advice for the energy sector.

Role: Providing expert advice on navigating the complex regulatory compliance landscape as POC-I LLC works to bring the Ilse Dome Field into compliance.

**Wheeler, Trigg & O'Donnell** – Litigation Support

Location: Denver, CO

Expertise: Wheeler, Trigg & O'Donnell handles complex litigation across various sectors, including environmental law, contract disputes, and professional liability.

Role: WTO will provide specialized litigation support to address and rectify issues related to previous contractors' failings. Their involvement is pivotal in resolving past disputes and securing the project's integrity for further development.
