(Indicate nature of data by checking below)

- Notice of intention to drill XXX
- Notice of intention to change plans _____
- Notice of date for test of water shut-off _____
- Report on result of test of water shut-off _____
- Notice of intention to re-drill or repair well _____
- Notice of intention to clean out well _____
- Statement of shooting _____
- Statement of perforating _____
- Notice to pull or otherwise alter casing _____
- Notice of intention to abandon well _____
- Report of work done on well since previous report _____

Following is a (notice of intention to do work) April 11, 1955
 (~~Report of work done~~) (On land) (patented) described as follows:

Colorado State Morgan County Huey Ranch Field
13 (Well No.) Geo. E. Huey, et al (Lease) NE SE 28 SE/4 (Sec. and $\frac{1}{4}$ Sec.) 2-N (Twp.) 56-W (Range) 6th PM. (Meridian)

The well is located 1880 ft. (N) of South line and 660 ft. (W) of East line

The elevation above sea level is _____ ft.

Details of Plan of Work: (State names of and expected depths to objective sands: Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

Top of: Niobrara.....4250'
 Timpas.....4595'
 Bentonite.....4975'
 Dakota "D".....5050'
 Dakota "J".....5150'

The object depth of this well, will be 5200' or such other depth as is necessary to adequately penetrate and/or test the Dakota "J" sand formation. Using rotary tools throughout the operation, tests and/or cores will be made of all intervals of interest. Casing program will be thus: Approximately 100' of surface casing (10-3/4") being set with about 125 sacks of cement. If the well appears productive, 5 1/2" casing will be set through zone of productivity. 150-75 sacks of cement will be used to effect such work. Mud used will be controlled to such densities as is necessary to overcome hydrostatic pressures.

Approved: APR 27 1955
