This is a follow up inspection per doc# 707901335. At time of inspection it appears the only corrective address and completed was mechanical issue for the Hozontal seperator burner stack installed. At time of inspection all other corrective action had not been addressed. Road and facility had been mowed but as stated in previous inspection road and location had debris that needed to be removed from seconday containment and around equipment, and road need to be maintained per photos neither were completed fully. In addition Production reports and braden head reports that wre requested by inspector by 2-20-24 they were not recevied through the FIRR process. KPK will recieve a corrective action for non reporting of FIRR and do non compliance of corrective actions in previous inspection, inspection will be submitted for NOAV.	silverr	03/21/2024
