Comment:

There is an open wellbore at the location that is now covered with an orange safety cone. The well still needs to be secured with a metal cap as the cone could easily fall over exposing the open well. It appears unused risers and utilities have been removed. There has been no water well permit issued for this well and the Operator is still responsible for well abandonment and reclamation. All unused areas of the location must be reclaimed except for 5 ft. around the well if a permit is issued. All gravel must be removed and soils will need to be properly decompacted. Corrective action will remain out of compliance until completed.

Corrective Action:

Comply with 1004 Rules
Immediately cover and secure wellbore to prevent entry.
