INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

The Foxtrot 34-10 Pit was used as a produced water pit. The pit was lined. For closure, the pit liner has been removed, and Evergreen is intending to conduct soil samples to ensure no impact to soils from associated E&P Waste.

PROPOSED SAMPLING PLAN**Proposed Soil Sampling**

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Grab samples will be collected from three in-situ locations, and one native location. The samples will be analyzed for Soil Solubility for Reclamation analytes from Table 915-1. The area of highest impact, SS2, was analyzed for full 915-1 analytes.

Environmental	Based on the information presented, it appears that no further remedial action is necessary at this time and the ECMC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding ECMC standards or if groundwater is found to be impacted, then further investigation and/or remediation activities may be required.	03/28/2024
