Bradenhead was blown down to 0 psi. On 11/29/2019 300 PSI performed a pressure test with nitrogen from 0730 to 0930 to 335 psi and 4 psi on bradenhead that held. Not enough nitrogen to restart the MIT for COGCC inspector to witness so pumper filled hole with 300 gals and perform pretest MIT on 11/30/2019. Inspection 12/10/20219 Document # 688306478 states "Bradenhead, slight vac that died immediately, casing slight vac that died immediately, casing 0 psi.

Operator to submit Form 17." MIT passed and Form 17 was submitted.
