**COGCC Comments**

Comment	User	Date
<p><a href="#">ECMC Inspection Report Summary</a>                      On 3-29-24 at approximately 12:00pm, I, Inspector Abe Serna, conducted an on-site inspection.                      Location: VT-Alles 1-16-18                      Operator: Civitas                      API#: 123-44415                      County: Weld                      While there, I observed a PR Well                      During this inspection no possible compliance issues were observed:                      A call was made about a gas leak. After talking with Jeremy Martinez he explained to me that the flow line testing crew was performing annual pressure testing, also there was an employee that was grading location to level ground which was making a little dust and a PRV valve was being cleaned when a local landowner contacted Missy and asked what was going on after explaining the valve was going to be cleaned the landowner miss understood the task at hand and assumed there was a gas leak cause of the dust which was not the case.                      Weather conditions: Sunny                      I spoke with Jeremy Martinez what was discussed brief and to the point.                      No follow up on this site inspection needs to be conducted.                      This is a summary of inspection report.</p> <p>Any corrective actions from previous inspections that have not been addressed are still applicable</p>	sernaa	04/03/2024
