Operator Comments:

Previously, Sundry 403649636, was approved to install a permanent instrument air skid on the Howard 10N, 25C, 24C, 9C-22HZ Tank Battery (location 33161). It included trenching a line to the Xcel 11C, 22N, 25N, 12N-22HZ Tank Battery (location 434970). This connection would facilitate the operation of the Xcel facility equipment and the Xcel wells utilizing the compressor located at the Howard facility.

Due to the presence of a high-pressure gas gathering line and landowner requirements, connecting the Howard and Xcel Tank Battery facilities is not feasible. KMOG will address this issue by installing an air skid at the Xcel facility.

KMOG is submitting this Sundry to install a 15hp permanent instrument air skid at the Xcel 11C-22HZ Tank Battery (location 434970) to serve the facility equipment and the following Xcel wells: Xcel 11C-22HZ, 22N-22HZ, 25N-22HZ wells (location 434970) and the Xcel 22C-22HZ, 12N-22HZ and 32C-22HZ wells (location 428011) located on 2 separate well pads to the west of the facility.

In summary, an air skid will be installed at the Howard facility to serve the Howard facility equipment and wells (via approved sundry 403649636), and an air skid will be placed at the Xcel facility to serve the Xcel facility equipment and wells (via this sundry 403739402).

This equipment will not result in traffic, light, or noise impacts to surrounding stakeholders.

Installation is planned for April 30, 2024.

Please see attached plot plan.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
