Hi Josette & Paul,

Thank you for reaching out. CPW has no concerns with the use of a truck-mounted coil unit for one day and does not request timing limitations.

Please reach out with any questions,

Good morning Danielle,

I wanted to follow up on the BW Musser 6 project. Attached are the CPW consult documents.

Since we've had some changes to the procedure as described below, does this change how the stipulations apply? If so, we may have a window of opportunity to complete this project so we hoped to confirm your thoughts on the changes to arrange scheduling.

Thank you,

Josette Polk

Hello Danielle,

Regarding the below response on the well bore cleanout on Musser 6...

This operation has changed from a "rig" workover/cleanout, to a rig-less (truck mounted coil unit) cleanout. This operation is currently scheduled to only take 1 day... we're wondering if the below stipulation still applies to the new revised operation?

Thank you,

Paul R. Jibson

Hi Josette,

Thank you for reaching out. CPW requests that the wellbore cleanout at BW Musser 6, which utilizes a workover rig, be completed outside of the greater sage-grouse seasonal timing limitation of March 1 to July 15. Please reach out with any questions.

Thank you,

Hello Danielle,

Wexpro Company is requesting CPW approval for the following actions that will require form 4 submittal for Wexpro Company's workover rig activities on the BW Musser 6, located within High Priority Habitat: Greater Sage Grouse General Habitat Management Area.

BW Musser 6 - API# 05-081- 05447

Project Description: Wexpro Company requests approval to perform a wellbore cleanout

using a Workover rig.

No reclamation is planned for this project, all work will be done within existing disturbance of the production facility area.

Form 4 will be submitted upon your approval.

Best Regards,

Josette Polk
