Hi Josette,

Thank you for the opportunity to review the proposed installation of a 220-gallon methanol tank, solar pump, and a 330-gallon capacity secondary containment with netting to keep wildlife out of the secondary containment. CPW requests that these activities be performed outside the greater sage-grouse annual timing limitation of March 1 to July 15. Please reach out with any additional questions.

Hello Danielle,

Wexpro Company is requesting CPW approval for the following actions that will require form 4 submittal for Wexpro Company's installation of a methanol tank and secondary containment on the location listed below located within High Priority Habitat:

- Sugar Load Government #1 - Lat/Long: 40.928530 / -108.749560. API# 05-081-05427. SWNE 9 11N101W 6
- Wexpro Company requests approval to install a 220-gallon methanol tank and solar pump with a 330-gallon capacity secondary containment. Netting will be installed to keep wildlife out of the secondary containment. The methanol tank will be placed on an existing location, within existing disturbance. Please see the attached map for proposed placement. Upon completion of installation, an updated site facility diagram will be submitted.
- HPH: Greater Sage Grouse Priority Habitat Management Area
- No reclamation is planned for this project, all installation of tanks and containment will take place within existing disturbance of the production facility area.

Form 4 will be submitted to the ECMC upon your approval.

Best Regards,

Josette Polk
